

Aquaplate maxi

"The solution"

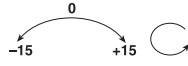

Aquaplate is a new range of in-ground floodlight that resolve one of the most frequent *installation's problem: protuberance from the ground*. The new items permit the installation where you can easily touch it, this is the reason of the low wattage of the lamps. Logically the new item could be used also indoors, and it will meet the needs of the designers. Thanks to this solution the possibility of using the in-ground light is increased again. Advantages: safety, easy installation and technology.

The installation is permitted in all areas **only** if maximum wattage is respected.

Aquaplate maxi

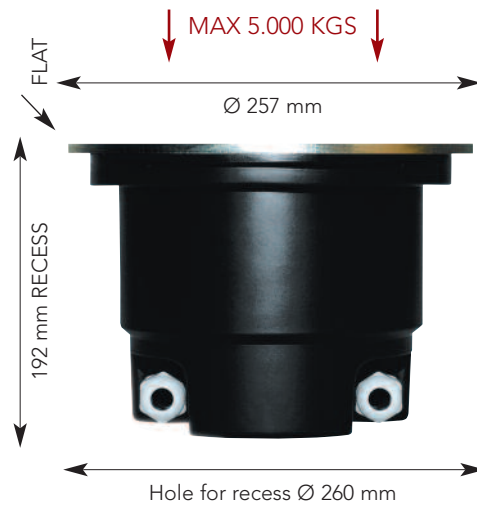

35 watt - G12

- FLAT RING
- G12 - 230 V - MAX 35 WATT
